Product information

Bohle has been awarded the DGM mark of quality by the German Furniture Quality Association

● Geprüfte Qualität
● Garantierte Sicherheit
● Gesundes Wohnen

...erkennen Sie an diesem Zeichen

Country of manufacture: Germany

Materials used:

The fronts, sides, shelves and rear panels are made from E1 chipboard. The visible areas are lacquered. The fronts, sides and shelves are 19-mm thick, shelves are 12-mm thick and rear panels are 5-mm thick.
The accent elements are embossed with veneered real-wood multi-layer panels.

The drawers are mounted on soft-close **full-extension Quadro runners**, and have been tested 40,000 times.

Doors and glass doors are mounted on nickel-plated, three-way adjusting, fast-assembly metal cup hinges, which have been tested 40,000 times.

Display-unit doors and glass shelves are made from optiwhite float glass.

Load-bearing capacity:

Base-element drawers have a load-bearing capacity of 15 kg; all other drawers have a load-bearing capacity of 10 kg when loaded evenly. Wooden shelves have a load-bearing capacity of 15 kg; glass shelves have a load-bearing capacity of 10 kg; additional information relating to load-bearing capacity can be found on the corresponding element.

Home hygiene:

Bohle meets the requirements for a healthy home environment, it has been tested for harmful substances in accordance with RAL-GZ 430/1-1.

Care instructions:

Wipe with a dry duster or a slightly damp cloth. The lacquers are highly resistant to abrasion in accordance with DIN 68861.

Electrics:

All lighting elements and connection cables are VDE-tested.

Energy usage:

The LED lights used are fitted with A^{++} to A LED bulbs, based on a scale of A^{++} (most efficient) to E (least efficient). The bulbs in the LED lights cannot be replaced.
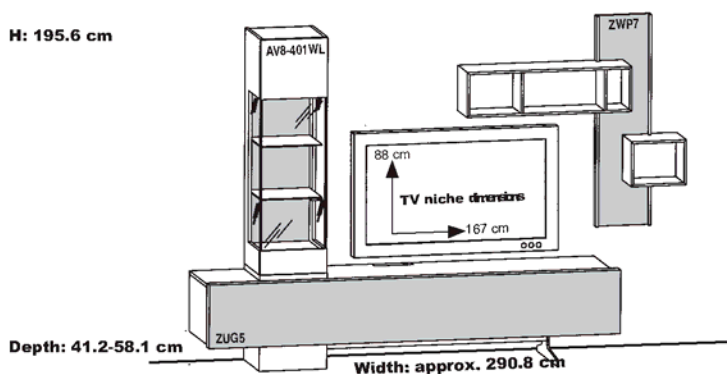

Subject to errors, as well as design, colour and material modifications as part of technical progress.

Product information about the covers

Leather: The **Toledo** leather used is a coated leather that is available in 43 colours as per the samples.

Coated leather is manufactured using complex refinement techniques. By polishing the surface of the leather, any irregularities are smoothed out and can no longer be seen. Thanks to the coating pigmentation, we are able to produce a regular surface in a beautiful, even colour. The natural structure is largely removed by the polishing and dying processes but it can be re-embossed to create a natural look. In doing so, the natural characteristics that are found in the structure of the leather are left partially visible. Coated leather is generally hard-wearing, easy-care, and above all, dirt- and water-repellent. In addition to being hard-wearing, the coating also reduces the leather's sensitivity to sunlight.

Cleaning and care instructions:

- Regularly dust the leather with a soft cloth. Avoid rubbing the leather vigorously.
- Never clean in small areas, but rather clean and care for the leather from stitch to stitch.
- Never pour cleaning or care products directly onto the leather. Instead, use a cloth or sponge to apply the product carefully.
- First clean the leather, then care for it: You should use important caring and moisturising substances so that your leather remains beautiful for many years. However, these substances can only be absorbed if there is no dust on the surface.
- Depending on use, leather furniture should be cleaned and cared for once or twice a year, e.g. before and after the summer months when the heating is not on.
- Never use microfibre cloths to clean leather – they may damage the surface. Only use soft, lint-free natural-fibre cloths.
- When cleaning, only use filtered water where possible as this reduces lime residue.
- Carefully mop up spills as soon as possible. When doing so, always clear up spills starting from the outside working inwards.
- After cleaning, allow the surface to dry properly before applying care products.
- Colour-intensive clothing, such as a jeans, may dye the leather. You can protect light-coloured leathers by treating them with Keralux R protection cream. We recommend using **LCK** products to clean and care for your leather.

Fabrics: The **Imola, Luxury** and **Amaro** fabrics used are available in 18 colours. They are treated with a stain protector that prevents spills from penetrating deep into the fabric, and also helps to remove spills more quickly.

Technical characteristics:

|	Imola	Amaro	Luxury
Martindale test rubs:	35,000	25,000	40,000
Pilling test:	4	4-5	4-5
Resistance to fading:	4	4	4

Cleaning and care instructions:

- Always use a clean cloth and clean the fabric in a circular motion. Do not let the fabric become too wet.
- Avoid exposure to direct sunlight as the fabrics may fade.
- Do not use any impregnating agents, bleaching agents or similar chemical substances.
- Our fabrics are almost pilling-free. However, if pills should form after extended use, they can be removed using a commercially available lint shaver.
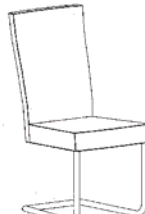

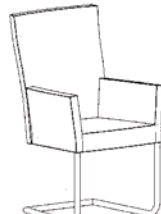

Please see the current Gwinner fabric and leather samples for the available covers.

Subject to errors, as well as design, colour and material modifications as part of technical progress.

Chair information

Information about the dimensions:

H: Height
ARH: Armrest height
SD: Seat depth
SH: Seat height
D: Depth
W: Overall width

Seat shells: For the **Lara** and **Lena**:

The seat shells are manufactured by gluing together several layers of birch veneer using heat and pressure. This results in a shaped wooden shell that is highly stable but weighs very little.
On the Lara, the seat shell is available in various matt silk lacquers; on the Lena, the seat shell is veneered.
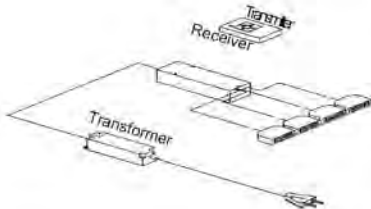

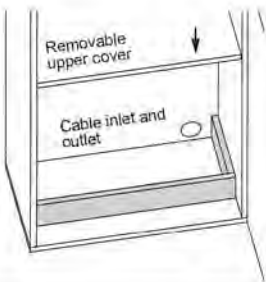

Gliders:

All chairs are delivered with plastic gliders as standard. Felt gliders designed for delicate floorings are included with all deliveries and can be used in place of the plastic gliders if necessary.
**Covers:**
Please see the current Gwinner fabric and leather samples for the available covers.

Accessories

Article	Order no.		Description
Lighting and switches			The lights are fitted with **A++** to **A** LED bulbs on a scale of **A++** (most efficient) to **E** (least efficient). The bulbs in these lights cannot be replaced.
LED lighting set			
For 7-incr shelf element **ZWP1 - ZWP9**	LEDSET30		consisting of 4 LED lights, cable length approx. 4 m. 12 volt/14.2 watt, 6-way distributor, 2 thin paintable cable ducts, 59-cm long. Transformer required.

Electrical accessories

Article	Order no.		Description
IR repeater Receiver on stand, as shown	IRST	 Receiver Transmitter IR = infrared	The IR repeater increases the range of standard IR remote controls within the unit. A DVD player can therefore be operated from behind a closed flap, for example. Incoming IR commands from the appliance's remote control are received by the receiver, amplified and passed on inside the unit via the transmitter. The advantage is that the repeater only passes on signals, it therefore does not require its own remote control. A 220-volt mains connection is required for operation.
Receiver is drilled into the plinth	IRWP		
Induction charger for mobile phones	KLG		Integrated induction charger for mobile phones that is fitted 10 cm from the back and 10 cm from the right in the base-element top and is invisible from the outside. Depending on the mobile phone manufacturer, a special accessory may be required from a specialist retailer so that the end device can be charged. A 220-volt mains connection is required for operation, the charging current is 5 V DC/ 1 A
Cable duct Plain	KB100		Length 100 cm, width 7.5 cm, depth 1.8 cm. Made from paintable plastic. Can be shortened using a backsaw during installation.
Lacquered	KBF100		Same finish, but lacquered in matt silk white, fango, taupe or mango.

Shelf

Article	Order no.		Description
